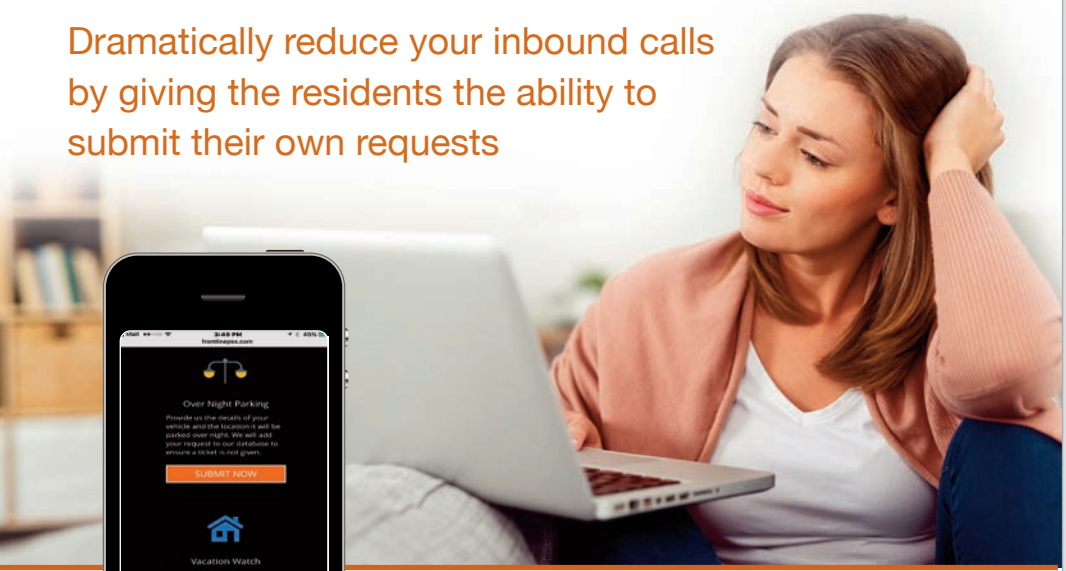
Dispatcher Module

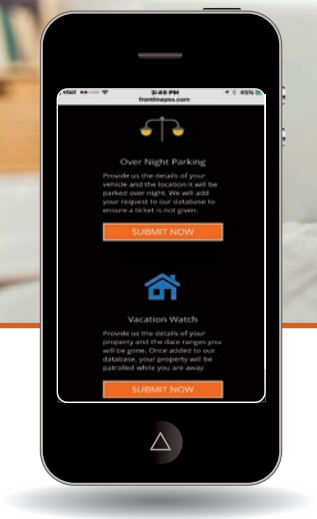
Ability to access all towns from one screen and provide data to police departments in real-time

- One log-in gets dispatchers access to all departments
- Real-time data passed between dispatcher and department
- Quick access to a department's data will reduce resources
- Allows dispatchers more time to handle emergency calls

Public Portal Advantage

Dramatically reduce your inbound calls by giving the residents the ability to submit their own requests





Available Modules:

- Easy to use webpage accessible from desktop or mobile browsers
- Public access entries delivered real-time to the tool-kit modules
- Set up hyperlink from police or village website to Frontline Public Portal

Here is what our customers have to say...

"Since going live with the overnight parking public portal, we have **reduced** the amount of **calls** coming into our dispatch center by approximately **80 percent**. This allows our dispatchers to handle emergency calls and not divert their attention to non-emergent calls requesting overnight parking permission."

William J. Perna Sr., M.S.
Director of Public Safety
County 911 Coordinator
Office of Emergency Management
Gloucester County Department of Emergency Response

"No more looking in multiple places for overnight parking exceptions. No more going back to the station flipping through binders to find key holder information. No more lengthy phone calls taking vacation watches. No more trying to figure out if the dog the officer just picked up is the same dog as last week. No more delays in the distribution of important details including a photograph of your missing resident who suffers from dementia."

Sergeant Amy Williams
Huntley Police Department
Illinois

"We no longer have to use handwritten forms or spread-sheets. Your software will allow us accurate databases that will help everyone from a patrol officer all the way up to my office. The user-friendly format is perfect for our citizens and officers."

Chief Roy Newton
Lombard Police Department
Illinois
